Finding vertex of a quadratic function worksheet

I'm not robot!

Directions: Complete the table of values to graph each function.

## $f(x) = x^2 - 6x + 5$

X	0	1	2	3	4	5	6
f(x)							

## Step 1: Substitute the value given for x into the function to determine the value of f(x).

c	Car.	2	C E		
ı	(X)	X	6x +5	where $x = 0$	

f/v) -	$0^2 - 6(0) + 5$	
X   =	U0(U) +3	

Substitute 0 for x.

f(x) = 5

This is the value for f(x).

Write this value in the table under 0.

## $f(x) = x^2 - 6x + 5$ where x = 1

$$f(x) = 1^2 - 6(1) + 5$$

Substitute 1 for x.

f(x) = 0

This is the value for f(x).

Write this value in the table under 1.

## $f(x) = x^2 - 6x + 5$ where x = 2

 $f(x) = 2^2 - 6(2) + 5$ 

Substitute 2 for x.

f(x) = -3

This is the value for f(x). Write this value in the table under 2.

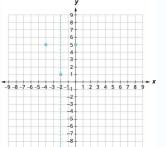

$$f(x) = x^2 - 6x + 5$$
 where  $x = 3$ 

 $f(x) = 3^2 - 6(3) + 5$ 

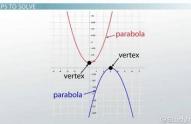

Substitute 3 for x.

f(x) = -4

This is the value for f(x). Write this value in the table under 3.

How to find the vertex of a quadratic function example. How to find the vertex of a quadratic function worksheet. Finding the vertex of a quadratic function in standard form worksheet.
